A world of motion where everything is possible

Since day one, back in 1983, our core aim has been clear. To create, together with our partners, a better mobility experience for people, through lifts that excel in safety, technology, innovation, efficiency and aesthetics. Today **KLEEMANN** is amongst the most important lift manufacturers in European and global markets, with products and applications that range from residential and commercial lift systems for persons or freight, to escalators, moving walks, accessibility solutions, marine lifts and lift components.

More than just lifts

Think of life as a powerful force for evolution. Lifts not only move people and freight to the next floor. They are actually moving life, taking part in all its social and economic aspects.

Life-space mobility has transformed, and moving with ease and safety inside buildings has become more important than ever.

KLEEMANN products are the yield of distilled experience and compact knowledge of how people move and interact. Going beyond nuts and bolts and in the era of digital transformation and sustainability, KLEEMANN lifts are spaces that merge the physical aspect of life with the digital factor. Contemporary solutions that serve and facilitate current life and lead it to the future.

<p>WIDEST PRODUCT RANGE IN THE WORLD</p> 	<p>EXPERTS IN SPECIAL PROJECTS</p> 
<p>WORLD CLASS DESIGN</p> 	<p>RECORD FAST DELIVERY FOR STANDARD PRODUCTS</p> 

The spirit of innovation

Innovation is key to every KLEEMANN operation, from engineering and technologies, to creating smart and digital tools. Over time, the company has invested in state-of-the-art testing towers and in the integration of IoT and energy saving technologies, production automation and new digital processes.

Innovation drives everything we do

KLEEMANN China testing tower

Inspiring values

KLEEMANN values are interwoven with the company activities. They are reflected in the management model and in the entire range of its operations.

Safety

We take all necessary measures to ensure the health and safety of our personnel, customers and users when using our products and within our premises.

Trust

We do what we say and we say what we do. We place trust in our people and their abilities. At KLEEMANN, we are a united front. We are all aligned with each other and with our vision.

Passion for People

The well-being of our colleagues and customers is of utmost importance to us. We invest in the strength of the bond between the company and its personnel. We are truly passionate about what we do and we strive to create opportunities for personal and professional development for all.

Breakthrough Culture

Innovation, growth, development and improvement are all vital to our business model. We set high goals, we commit to them, we take risks and we determinedly turn any opportunity into a learning experience. We are not afraid to fail.

Certified Quality

The high and consistent quality of KLEEMANN production processes, products and services is a non-negotiable commitment. At KLEEMANN, we implement a complete Quality Assurance System that meets all safety and quality standards and exceeds typical requirements. We apply more than 80 internal procedures and comply with:

EN ISO 9001: 2015
Quality Management System

EN ISO 10002: 2014
Quality Management - Customer Satisfaction

EN ISO 14001: 2015
Environmental Management System

EN 1090-1: 2009 + A1: 2011
Steel and Aluminum Structure (sets)

EN ISO 45001: 2018
Occupational Health and Safety Management System

EN ISO 14006: 2011
Eco design standard

People at the heart

Seeing and understanding human activity, makes KLEEMANN create solutions based on real wants and actual needs. This dedication to excellence in the service of people, is reflected in all decisions and initiatives.

Strong focus on values such as trust, responsibility and loyalty towards employees, customers, users and business partners, has been recognised by the industry through various awards related to corporate value, coaching, customer service, Health & Safety and Best Workplaces.

Sustainable growth

Expanding the people-oriented approach to environmental protection, KLEEMANN prioritizes sustainable growth and applies practices of responsible energy use. Energy efficiency and transition to sustainable energy are moving corporate action, production and everyday activities.

Flexibility & custom solutions

The focus on being flexible and agile, makes KLEEMANN easily adjustable to wants and prerequisites. Any scale project around the world can be served with pre-engineered or fully customized solutions that target to a superior vertical mobility experience.

Effortless customer experience

With experience, know-how and real dedication in understanding customer needs, KLEEMANN is offering a carefree customer journey. Business is easier with KLEEMANN.

Go to www.kleemannlifts.com and register to access the E-shop

KLEEMANN Academy

KLEEMANN Academy is an **online education platform for lift technicians**, designed to remotely offer training on KLEEMANN lifts. By joining the Academy, the visitor gains access to easy, useful, educational content, takes part in virtual events and upgrades knowledge on the KLEEMANN world of lifts.

Getting the knowledge, remotely

- Live webinars
- Educational material
- Live events on product installation
- Self-paced, downloadable lessons
- Email notifications concerning new courses
- Constant update on any technical changes & training priority
- Customized Learning Path creation for technicians, according to specific needs
- Limited period accounts for subcontractors
- KLEEMANN certification with the completion of each lesson
- A 360° report system on each team member's progress

For more information on KLEEMANN Academy contact: academy@kleemannlifts.com

KLEEMANN Design

Design is for people. Every project KLEEMANN undertakes, is an opportunity to provide solutions of aesthetic excellence, covering all engineering prerequisites, adapting to regulations and taking the best out of any apparent restriction.

Creative power

Design has to integrate reality, foresee tomorrow and create an elevated user experience. Rather than thinking of an elevator as a box that moves, we see it as an active social space in a building, that is used and lived by people.

Industrial designer Andreas Zapatinas joined the creative forces of KLEEMANN in 2007 and new technical and aesthetic solutions have been explored. Since then, the experienced KLEEMANN Design Team has build on these fundamental ideas taking KLEEMANN lifts to the next level.

KLEEMANN Design Services

A special Design Team serves as the creative force behind the development of lifts for any challenging project. Our designers combine solution-oriented design with a service-driven approach, delivering:

- High quality virtual proposals
- Digital animation of your project
- Architectural design assistance directly with you
- Architectural assistance to determine materials
- On site visit / feedback from you

Custom solutions

KLEEMANN enjoys a favorable worldwide reputation for its customized design expertise. KLEEMANN offers pre-engineered or fully-customized elevators, to perfectly fit in each and every project. Being vertically integrated, KLEEMANN designs and manufactures in a way that enhances expertise and flexibility to respond reliably, quickly, precisely, and cost effectively to customer's specifications.

How to

Contact our Design Team and transform your building at design@kleemannlifts.com

Design your Lift

Create and view in real time, the look and feel of the elevator just the way you want it to be incorporated into your concept design, with KLEEMANN **Design your Lift**.

KLEEMANN **Design your Lift** is an innovative tool that brings your designs to life with 3D modeling. Combine materials making your selection from a wide range of options such as walls, ceilings and floors. View your creation and share or download it, quickly and effortlessly!

KLEEMANN After Sales Service

To ensure that designing, ordering, receiving and maintaining products is as stress-free and effortless as possible, KLEEMANN provides dedicated service teams that offer additional **support and guidance at every stage.**

- 24/7 support in 9 languages
- Detailed technical manuals & illustrations
- Lift Tester app to test performance on site
- KLEEMANN Live system
- KLEEMANN E-shop for 24/7 spare parts orders
- Network of local spare parts warehouses on strategic map locations
- Quick & efficient delivery system
- Field visit available upon request
- Service team available to support 1st KLEEMANN installation on site
- Troubleshooting webinars

KLEEMANN Live

KLEEMANN Live is an IoT system that collects, transmits, analyzes data and provides insights for lifts in real time. It keeps you linked 24/7 so you can have access to the lifts' status remotely any time, offering peace of mind to customers.

All needed is

- A new or existing installation with GENIUS20 control panel
- The plug & play hardware (gateway-autodialer)
- SIM card with data for cloud connection and minutes for autodialer calls
- To visit live.kleemannlifts.com using your KLEEMANN credentials

Easy remote check

- See the live status of all connected lifts
- Check messages
- Inspect rides & statistics
- Edit parameters if needed
- And all these from your laptop or smart device

Benefits

SAVE TIME & MONEY

Reduce the duration of visits to the site
Reduce the number of scheduled maintenance visits save up to **30%** expenses

GROW YOUR BUSINESS

Expand and support more contracts with the same number of technicians
Reduce the number of call outs by **20%**

POWER UP YOUR PERFORMANCE

Extend equipment lifetime
Reduce down-time from unexpected problems up to **10%**

Mobile & Tablet Apps

LIFT CONTROL

For facility managers:

- Monitoring elevators
- Remote call elevators
- Ticketing system for support
- Calendar with events
- Documents management

LIFT CONTROL PRO

For elevator technicians:

Download the app, connect and control all your lifts. A user-friendly application that allows you to remotely keep track of the majority of KLEEMANN Live functions.

Upgrades
Green lifts

Green lifts

KLEEMANN believes in sustainable development and actively safeguards the right of future generations to inherit a safe, healthy and prosperous environment.

Leveraging on innovative methods from engineering to production, KLEEMANN provides Green lifts that feature a range of eco-friendly options.

A

REGENERATION OF "CLEAN ENERGY"

Regenerative power through integrated components (Regeneration Drive)

REDUCTION OF OPERATING COSTS

Standby Mode function and LED lighting for greater energy saving

REDUCTION OF CO₂ EMISSIONS

Contribution to reduction of CO₂ emissions makes the elevator more environment friendly

EFFICIENCY IN POWER SUPPLY

All KLEEMANN traction lifts feature VVVF drive, regulating power supply for energy efficient operation

At our production processes

87,54%

of total electricity consumed in 2022 in our facilities, came from Renewable Energy Sources (RES).

CERTIFIED EMS (ENVIRONMENTAL MANAGEMENT SYSTEM) ACCORDING TO

ISO 14001

Covers the production unit in the industrial area of Kilkis (office, facilities & factories).

At our products

75%

More than 75% of the waste from the installation of a KLEEMANN elevator is recyclable.

ECO-DESIGN PRODUCTS ACCORDING TO

ISO 14006

KLEEMANN provides Environmental Fact Sheets for Atlas Basic, Atlas Gigas R, Atlas RPH R (for 450kg and 630kg), FlexyLift R, Maison100 E, HRS MR and Purity cabins.

Regular assessment on products' full life cycle

Achievement of eco-optimized product design

- Less raw materials
- Less paints
- Less cables

Available upon request

- Lift energy efficiency studies according to VDI 4707-1 & ISO 25745-2
- Application of environmental assessment methods for energy analysis BREEAM (UK) / LEED v4 (US)

Upgrades
Hygiene line

Hygiene line

Cabin hygiene has always been a key challenge in lift engineering and design. KLEEMANN presents an innovative series of solutions for **safer cabin environment** and extra protection for passengers at all times.

Air Purifier

A solution for pure uncontaminated air in the cabin, clean of bacteria & viruses

Touchless buttons

An 100% antibacterial solution that operates by infrared induction which detects the call's activation

Anti-Bacterial buttons

Blue Line KLH-42R buttons with nano-silver coating, that can provide antibacterial and antifungal protection

Upgrades
Anti-vandal

Anti-vandal (EN 81-71)

Anti-Vandal lifts withstand heavy use and abuse, thanks to vandalism resistant materials. Ideal solution for busy public spaces.

Advantages

- Designed according to EN 81.71
- Reduced number of incidents and costs of damage repairs
- Robust and of high technology for exceptional ride quality

How to

To help eliminate any damage caused to lifts in unsupervised settings, we offer a complete product which adheres to Cat 1 and Cat 2 of EN 81-71. For more info go to:
[Product Features Anti-Vandal Lifts | KLEEMANN \(kleemannlifts.com\)](#)

Upgrades
Destination
Control System

Destination Control System

The Destination Control System increases efficiency in lift operation and exceedingly reduces waiting times in buildings with high traffic density

Advantages

- Passenger comfort
- Energy saving / Cost reduction
- Flexible configuration
- High efficiency and safety

How to

Find out everything about DCS at
[Product Features Destination Control System | KLEEMANN \(kleemannlifts.com\)](#)

Upgrades
Earthquake
Resistant

Earthquake Resistant lifts (EN 81-77)

KLEEMANN is the first in Europe to exclusively introduce a system that turns any hydraulic or traction lift to earthquake resistant

Advantages

- Seismic sensor for seismic waves detection
- Passenger notification automation
- Special armoring in vital parts
- In compliance with EN 81-77 or ASME A17.1
- Option for upgrading lifts by partial installation
- Smooth operation and reliability

How to

For more information check:
https://www.youtube.com/watch?v=S_dcUw5-E6c

Upgrades
Firefighting

Firefighting (EN 81-72)

Firefighting elevators allow firefighters to rescue passengers who may be trapped on upper floors during an event of emergency in a building

Advantages

- Trap doors and ladders for rescue operations
- Splashing water protection for electrical components in shaft and on car
- Operation according to EN 81-72

How to

Find out about firefighting elevators (EN 81-72) at

<p>EARTHQUAKE RESISTANT (EN 81-77)</p>	<p>HYGIENE SOLUTIONS</p>		

Recommended uses

Residential

Description & features

FlexyLIFT R is a cost-effective, eco-friendly and versatile lift solution that can be adapted to fit specific shaft dimensions and machine room requirements. It is ideal for existing or new residential buildings that have pit and headroom limitations. The small cabinet option for the power unit and controller, enables installation in shafts with or without a machine room.

Minimum requirements

Offering a rated load capability of 180–1000kg, almost no pit depth requirements and a minimum headroom of 2600mm, FlexyLIFT R is the perfect hydraulic solution for lift modernization in low and mid-rise buildings.

Outstanding ride quality

FlexyLIFT R is designed to deliver both premium quality construction and exceptional ride comfort. Low noise levels and minimal vibrations ensure a smooth and pleasant passenger experience.

Technical specifications

Model	FlexyLIFT R
Rated load (Kg)	180-1000
Suspension	1:2
Machine room	MR
Max travel (m)	25
Max number of stops	8
Max speed (m/s)	0,74
Min pit depth (mm)	300
Min headroom (mm)	2600

FIREFIGHTING (EN 81-72) 	HYGIENE SOLUTIONS 	DESTINATION CONTROL SYSTEM 	SCAFFOLDLESS INSTALLATION

Recommended uses

Residential
 Commercial & Public

Description & features

Atlas Basic is a highly economical traction MRL solution for residential buildings. Serving rated loads of 375–1000kg, it is designed to offer both reduced total cost of ownership (TCO) and value for money.

Minimizing sound & costs

With premium quality gearless motor and speeds of up to 1.6m/s, it is equipped with a state-of-the-art inverter that minimises sound, ensures ride quality and a very low energy consumption.

Emergency evacuation

In the event of power failure, the emergency evacuation system ensures safe transportation of passengers to the nearest floor where doors automatically open to allow car exit.

Low noise levels

Remarkably low noise levels inside and outside the cabin. The noise level inside the cabin (measured according to ISO 18738) during the lift operation reaches 52-54 dB.

Technical specifications

Model	Atlas Basic
Rated load (Kg)	375-1000
Suspension	2:1
Machine room	Machine Room-Less (MR as an option)
Max travel (m)	65
Max number of stops	24

<p>FIREFIGHTING (EN 81-72)</p>	<p>HYGIENE SOLUTIONS</p>		

Recommended uses

Residential
Commercial & Public

Description & features

Atlas RPH R provides a practical traction MRL solution for residential buildings with pit and headroom limitations. Suitable for rated loads up to 1050kg, Atlas RPH R features KLEEMANN's premium quality gearless motor and speeds of up to 1m/s.

Ease of installation

Atlas RPH R needs only one wall for the installation with most of the subunits pre-assembled and ready to be installed.

Spatial efficiency

Suitable for buildings with reduced pit and headroom, Atlas RPH R is ideal for modernization of existing lifts. Designed to support the installation of up to three cabin doors.

Advanced inverter

The state-of-the-art inverter minimises noise and delivers outstanding ride quality and exceptionally low energy consumption. Ideal for the modernization of existing lifts and those with narrow shafts, Atlas RPH R complies with Lifts Directive 2014/33/EC and standards EN81-20, EN81-21 and EN81-70.

Technical specifications

Model	Atlas RPH R
Rated load (Kg)	450-1050

Extra features & upgrades

KLEEMANN LIVE 	KLEEMANN PORTAL 	GREEN LIFT 	ANTI-VANDAL (EN 81-71)
EARTHQUAKE RESISTANT (EN 81-77) 	FIREFIGHTING (EN 81-72) 	HYGIENE SOLUTIONS 	DESTINATION CONTROL SYSTEM

Recommended uses

Commercial & Public
Hotel
Hospital
Industrial

Description & features

Atlas Gigas R is an ideal traction solution for a range of rated loads of 1050–2500kg and up to 1,6m/sec. Offering the option to install a larger car in a standardized shaft, Atlas Gigas R provides optimum space efficiency for buildings with high density passenger flow.

Stopping accuracy

Due to its gearless motor and state-of-the-art inverter, Atlas Gigas R offers excellent stopping accuracy that does not exceed 2mm while the ride quality exceeds all quality standards (measurements based on ISO 18738).

Machine lifting system

Atlas Gigas R is supplied with a machine lifting system, especially designed to facilitate the installation of high rated load lifts, hence, larger motors.

Spatial efficiency

Optimum space efficiency is granted for high density passenger flow provided by the capability for larger car installation in a standard shaft.

Technical specifications

Model	Atlas Gigas R
Rated load (Kg)	1150-2500

Recommended uses

Commercial & Public Hotel

Description & features

The high-speed HRS KLEEMANN Lift delivers outstanding ride quality and innovative Remote Lift Monitoring System. Destination Control ensures reduced waiting times and smooth passenger experience.

Premium ride quality

The isolated roller guide shoes limit vibrations and offer premium ride quality and cost saving. Exceptionally long service life for rollers due to the spring system and the permanent contact with the guide rail.

Remote Lift Monitoring System

Providing the opportunity for improved lift management, the Remote Lift Monitoring System is an excellent solution for buildings with multiple lifts enabling the efficient and simultaneous management of up to 18 lifts.

Reduced waiting times

The Destination Control System reduces waiting times by serving the increased number of calls, where it is important for the passengers to be transported rapidly.

Technical specifications

Homelift Maison100 E

The innovative electric cabin platform lift, with premium design, that makes best use of available space and is extremely energy efficient

Type of lift > Electric

Extra features & upgrades

Recommended uses

Private residences

Description & features

Acknowledging the importance of space availability, KLEEMANN introduces Maison100 E, with 100mm minimum pit depth and 2500mm headroom required. Available with semi-automatic or automatic doors, Maison100 E can be also provided with an aluminum shaft construction where a masonry shaft is not available.

Technical specifications

Model	Maison100 E
Rated load (Kg)	Up to 400
Max travel (m)	12
Max number of stops	5
Max speed (m/s)	0,15
Pit depth (mm)	100
Headroom (mm)	2500
Maximum car entrances	2
Complies with	Machinery Directive 2006/42/EC

Premium Design

Cabin's special design ensures ease of installation while the RGB colours' lighting creates an outstanding ambience.

Fast and easy installation

Smart and compact design for installation in just 3 days.

Plug n' play solution

Prewired shaft wiring and single-phase power supply.

Low noise levels

Innovative electric drive (VVVF controlled) guarantees remarkably low noise levels in and out of the cabin.

Homelift Maison100 H

Safety and style with this value for money hydraulic home lift solution, with minimum space requirements

Type of lift > Hydraulic

Extra features & upgrades

Recommended uses

Private residences

Description & features

Ideal for comfort and ease, Maison100 H, is designed and manufactured according to Machinery Directive 2006/42/EC and meets any need for transportation and mobility. A value for money solution that provides access inside or outside a multi-storey private residence and guarantees safety and style.

Value for money

Its very low energy consumption (lower than a kitchen oven) in conjunction with its cabin design, makes Maison100 H the ideal value for money choice. With 100mm minimum pit depth and 2400mm headroom required, it is perfectly suitable for buildings with or without concrete shaft and with shaft pit and headroom limitations.

Optimum use of space

The pit and headroom requirements are amongst the most competitive in the market for enclosed cabin platform lifts. Maison100 H for Home Solutions offers optimum space efficiency by providing the opportunity of installing larger car in a standard shaft.

Plug n' play solution

Prewired shaft wiring and single-phase power supply.

Premium ride quality

Maison100 H offers a premium ride quality, with the new controller Genius20, with tape head system for precise floor levelling and a 2-speed hydraulic valve.

Technical specifications

Model	Maison100 H
Rated load (Kg)	Up to 385
Max travel (m)	12
Max number of stops	5
Max speed (m/s)	0,15
Pit depth (mm)	100
Headroom (mm)	2400
Maximum car entrances	2
Complies with	Machinery Directive 2006/42/EC

Homelift Maison200 H

A hydraulic homelift solution that offers a wide range of design options for a personalized experience

Type of lift > Hydraulic

Extra features & upgrades

Recommended uses

Private residences

Description & features

Maison200 H is a hydraulic solution that offers an efficient use of space and can be easily adapted to any architectural need and design, even for special and challenging projects. Elegant and convenient allows the perfect fitting in any building, existing or new. Maison200 H guarantees outstanding ride quality and a wide selection of design options and finishes to meet your aesthetic needs.

Technical specifications

Model	Maison200 H
Rated load (Kg)	Up to 630
Max travel (m)	12
Max number of stops	6
Max speed (m/s)	0,15* - 0,3**
Pit depth (mm)	100* - 150**
Headroom (mm)	2450* - 2600**
Maximum car entrances	2
Power supply	Single phase or three phase
Complies with	* Machinery Directive 2006/42/EC ** AS1735.18

Efficient use of space

Maison200 H maximizes the efficient use of space. Even though the dimensions of the shaft remain the same, Maison200 H can accommodate a larger car, maximizing the usable space.

Customizable design options

Maison200 H offers a wide range of cabin types and interior materials. Whether you prefer a sleek and modern look or a more traditional aesthetic, Maison200 H can be tailored to suit your desired ambiance.

Premium ride quality

Maison200 H features premium construction quality, low noise levels and minimal vibrations. This ensures a smooth and comfortable ride for passengers, enhancing the overall experience.

Aluminum shaft option

In situations where a concrete shaft is not available or feasible, the Maison200 H offers an aluminum construction option.

Description & features

KLEEMANN hydraulic freight lifts combine maximum durability and high operating reliability. Their flexible design and manufacturing process provide them with the unique capability to be customized according to the building's requirements. They can handle any load up to 10.000kg which makes them the perfect solution for applications in industrial buildings, plants, warehouses, super markets etc.

Safety features

It is equipped with light curtains to provide additional safety and overload detection.

Robust construction

Equipped with heavy duty types of doors and sill tracks, cabin and protective bumper rails for extra robustness.

Description & features

Atlas Super Gigas is the optimum solution for freight transportation of rated loads up to 5.000kg. Equipped with KLEEMANN's premium quality gearless motor and state-of-the-art inverter, it presents excellent performance, ride quality and a low energy consumption. Fully exploiting the shaft space, it features tailored cargo lift struts.

Safe door closing

Atlas Super Gigas is equipped with light curtains to provide additional safety and protection when the car doors are closing.

Spatial efficiency

Optimum space efficiency by offering the option of a larger car installation in a standard shaft for rated loads up to 5.000kg.

Outstanding ride quality

Premium quality and exceptional ride comfort are delivered by both a gearless motor and a state-of-the-art inverter.

Stopping accuracy

Excellent stopping accuracy less than 2mm, while the ride quality exceeds all quality standards (based on ISO 18738).

Modernization
Solutions

Modernization Solutions

Modernization kits

KLEEMANN MOD Kits provide you with solutions that meet all standards and safety requirements

Safety kit

Safety kit ensures the safe operation of the lift for both passengers and technicians (includes safety gear, overspeed governor, emergency auto dialer).

A3 kit

Unintended car movement can be prevented with the installation of A3 kits (includes overspeed governor, controller, machine gearless or geared with slow shaft brake, bidirectional safety gears).

Eco friendly kit

Eco friendly kit ensures excellent ride quality and energy consumption for traction (includes gearless machine, LED lights, halogen free wiring) and hydraulic lifts (hydro VVVF).

EN81-21 kit

EN81-21 kit ensures that the existing lift obtains same safety level with a new one (includes, extra locking device, apron, base and maintenance beam low pit, split balustrade, controller).

Aesthetics kit

Upgrade the design of your lift by choosing from a wide range of cabins, car and landing operating panels.

EN81-20 kit

Upgrade the existing lift to recent European standards EN 81.20 to enhance safety for both passengers and lift technicians.

Hygiene kit

Choose from a complete series of hygiene products (touchless or antibacterial buttons, cabin air purifier, handrail sterilizers) to enhance the passengers' health inside the lift and on the moving walk.

EN81-72 kit

Upgrade and modify the existing lifts under EN 81.72 European norm, for Fire Services use.

Customized, reliable and compatible modernization solutions from full replacement or partial modernization, to components' replacement and special applications, that upgrade the user experience, effecting both the aesthetic and the mechanical part of elevators

Choose from a wide range of options and find those that match your requirements

- Machine (geared / gearless)
- Controller Genius20 (many options for cabinet)
- Sling (hydro / traction / counterweight)
- Cabin
- Doors
- Piston / power unit
- Shaft material (ropes, guide rails, encoder, oil cooler etc)

Product description & features

KLEEMANN Escalators & Moving Walks are the ideal solution for installations in hotels, hospitals, public and commercial buildings. KLEEMANN offers unique, tailor-made design services for commercial or heavy-duty Escalators with a wide range of options and customized solutions for all projects.

Recommended uses

Public and commercial buildings

Outstanding ride quality

Designed to ensure both high quality construction and exceptional ride comfort. Low noise levels and minimal vibrations provide a smooth and comfortable passenger experience that will meet even the strictest requirements.

Ease of installation

Ease of installation and use, providing spatial efficiency and reliability.

Eco-friendly

Regeneration system to provide excellent ride quality while reducing energy usage by up to 60%. Many of the products' parts recyclable (steps, brush profile, glass panel clamps, etc).

Hygiene line

Three sterilizer solutions for the Escalators' / Moving Walks' handrail, available to provide protection from bacteria and viruses.

- Ultraviolet Lamp
- Sterile Touch
- UV Sterilizer

Description & features

Single and double Scissor Lift Platforms provide a simple and convenient way to facilitate and optimize parking space. Suitable for underground, lower and upper parking levels, they are an ideal choice for parking areas where entrances and exits are restricted or limited. They offer up to 3 stops, an array of safety features and the choice of either 4000mm or 7400mm vertical travel.

Vehicle Turntable

Economical and convenient parking solutions that make the best use of available space for effortless parking

Technical specifications

Model	Vehicle Turntable
Min Pit Depth (mm)	250
Pit diameter (mm)	4600
Motor type	Hydraulic motor with slew ring drive
Rotation (degrees)	360

Product description & features

Vehicle Turntables facilitate parking in spaces that pose limitations such as a single entrance and exit. They offer an economical and convenient parking solution, maximizing utilization of available space, generating smooth traffic flow and enabling effortless parking. Featuring 360° rotation, driven by a hydraulic motor with slew ring drive, a 4600mm pit diameter and 250mm minimum pit depth, they can be customized to accommodate any specific platform and dimension requirements.

Hydraulic Parking Systems

Customizable solutions that provide additional independent space where multiple parking lots are required

Technical specifications

Model	UN_1+1	Hydro Park 1127	Hydro Park 1123	Hydro Park TPTP-2
Rated Load (kg)	2500	2700	2300	2000

Lifting/lowing time	-	<55s	<55s	<35s
Finishing	Powder coating/ galvanized	Powder coating	Powder coating	Powder coating

Description & features

Installation of Hydraulic Car Parking Systems provides additional independent parking spaces for 2 vehicles. These systems can be customized to fix existing spaces and are an ideal solution when multiple parking spaces are required in new or existing buildings.

Puzzle Parking Systems

Parking systems that provide a range of multi-storey solutions that enable independent parking of multiple cars

Independent Parking Systems

Independent parking lift platforms that allow the parking of a vehicle without moving other cars

Technical specifications

Model	BDP-2
Levels	2
Available car dimensions	1850*5070*1550-2050mm
Rated Load (kg)	2000-2500kg
Drive mode	Hydraulic cylinder + wipe ropes
Operation	Code, Card, Manual
Control	PLC centralized control system
Elevating speed	8-12 m/min
Sliding speed	7,5m/min
Power Supply	3phase/380V/50-60Hz
Finishing	Powder coating

Description & features

The selected parking space is moved to the desired position by means of an automatic control system and the parking spaces can be shifted vertically or horizontally. The systems integrate the latest advancements in stacking and sliding technology, maximizing the number of vehicles that can be accommodated in the available space.
